PROFESSIONAL SUMMARY

Frontend-focused MERN Stack Developer with 1+ year of experience building API-driven SaaS platforms and high-performance corporate websites. Strong proficiency in React, Next.js (App Router), TypeScript, and Tailwind CSS. Proven ability to engineer scalable UI architectures, optimize URL-driven states, and deliver SEO-friendly, production-ready web applications.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, Konva.js

State & Data: Zustand, TanStack Query, TanStack Table, React Hook Form, Zod, Redux Toolkit

Backend & Tools: Node.js, Express.js, MongoDB, REST APIs, Git, Vercel, jsPDF, Framer Motion

PROFESSIONAL EXPERIENCE

Frontend Developer | Betopia Group (March 2025 – Present)

- Engineered an optimized URL-state filtering hook ([useNextFilter](#)) for Next.js App Router with debounced navigation and responsive filtering.
- Developed a centralized server-side fetching layer ([nextServerFetch](#)) with automated JWT validation and Next.js caching support.
- Built reusable frontend systems including data tables, protected routing, and API-integrated CRUD workflows.

SELECTED PROJECTS

Mess Management System | Next.js, TypeScript, Tailwind CSS, shadcn/ui, Express.js, MongoDB

[Live Demo](#) | [Client GitHub](#) | [Server GitHub](#)

- Built a full-stack mess management platform with automated monthly billing, dynamic meal rate calculation, equal-share utility cost distribution, and role-based dashboards.
- Integrated an AI-powered menu planner and market scheduler that automates daily grocery lists based on budget limits and dietary preferences.

MentorIP Law Firm | Next.js, TypeScript, Tailwind CSS, shadcn/ui

[Live Demo](#) | [GitHub](#)

- Developed a high-performance corporate website featuring advanced JSON-LD SEO schema, dynamic HTML Table of Contents parsing, and a ⓂK global command palette.
- Enhanced user navigation and UX through On-Demand ISR (revalidateTag), optimized content caching, and advanced frontend interactions.

Mouza Map Pro | React, Konva.js, Zustand, jsPDF

[Live Demo](#) | [Proprietary Project](#)

- Engineered a high-performance 2D geospatial plotting tool using Konva.js, executing complex Shoelace algorithms to convert raw pixel distances into exact physical land areas (SqFt, Shotok).
- Implemented a custom physics-based repulsion algorithm to prevent label overlapping and integrated client-side PDF processing (pdfjs), delivering instant, scale-accurate A4 reports without server overhead.

EDUCATION

Diploma in Engineering | Dinajpur Polytechnic Institute (2021 – 2024)

ADDITIONAL INFO

Training: Programming Hero (Level 1 Completed, Level 2 Continuing)

Languages: English (Comfortable), Bangla (Native)
